The amendment received 28 August 2008 has been made of record. Claims 1, 3 and 5-10 are pending.

The finality of the previous office action is withdrawn and prosecution is hereby reopened.

Upon further consideration, the indicated allowability of claims 1, 3 and 5-10 contained in the previous office action is withdrawn.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3 and 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 defines the second block segment in terms of general formula 1. In general formula 1, B is defined as representing "an unsubstituted or substituted...with 1-15 carbon atoms". However, B is further defined as "optionally different". This further definition renders B undefined.

Additionally, the second block segment is defined as represented by general formula 2. This additional definition is seen as rendering general formula 1 unnecessary and confusing since it is not clear what applicants' intend the limits on the second block to be.

Appropriate correction/clarification is required.
